

It's Time to Remodel Your Website!

- Does your website look tired and out-of-date?
- Are you tired of paying your webmaster every time you need small changes made to your site?
- Don't have thousands of dollars for a website remodel?
- Want to maintain your own website quickly and easily?
- Would you like your blog design to match your website?
- Does "search engine optimization" sound like a foreign language to you?

Don't worry! I've got a website creation team that will custom design your website—with or without a blog—create your site using a state-of-the-art WordPress theme, and add search engine optimization that Google and Yahoo! will love. **And**, I'll give you the training you'll need to do basic maintenance to your own website.

For only \$849!

I know — it sounds too good to be true, and a few years ago it would have been. With today's WordPress blogging platform themes, your website can be built more quickly and easily than ever before.

What will you need to do?

- Fill out a detailed questionnaire to help us design your website quickly and efficiently.
- Give us your content and photos.
- Wait a little while as we create your site (this is the hardest part).
- Be available for training on how to maintain your site.

That's all there is to it.

Email me today at Melodee@Short-termSolutions.com to get started!

What will you receive in our **Small Business**

Remodel package?
